

Write large whole numbers in words

1. A prospective home buyer is making an offer to purchase a home. The document requires that the amount offered is written in words. The offer price is \$645 500. How should this be written?

2. To reduce the opportunity for fraud, bank cheques show monetary amounts in words. How would \$3 542 be written?

3. Adding a zero to the end of a whole number makes a big difference. Write the following two numbers in words.

300 000 _____

3 000 000 _____

4. To avoid misunderstandings an investor writes all purchase and sell orders in words.

Re-write the following orders with the numbers in words?

a. Sell 1 005 shares in BNP: _____

b. Buy \$95 500 worth of shares in Plank Mining.

Pointers:

1. A whole number is a number without a decimal portion. For example 6 is a whole number but 6.5 is not.
2. A contract is an agreement that is enforceable by law.
