

**Interpret restrictions in familiar tables and signs**

The sign on a rollerblading rink says:

'No pro-rata rates' means that you have to pay for a whole hour even if you only stay for a part of it.

1. Desmond rode for two hours and hired rollerblades. How much did it cost him?
2. A group of 4 friends spent 3 hours at the rink and two of the friends needed to hire rollerblades. How much did it cost them altogether?
3. Justin was delayed and didn't start rollerblading until 8.30 pm. He stayed until closing time. Given that he had his own rollerblades, how much did it cost him?
4. Suzan can buy a pair of new rollerblades for \$250. How many times could she hire rollerblades before buying new rollerblades becomes cheaper?

**Pointers:**

1. Closing 10 pm sharp means that the rink will close exactly on time.
